INFORMATION FOR OWNERS OF RACING GREYHOUNDS

How do I place my Greyhound into the Adoption Program?

Complete the enclosed questionnaire with your dog's particulars and send it to us by post or fax. Once we receive the questionnaire, the dog will be placed on our waiting list. We do not generally contact you again until we are almost ready to take your dog.

Is there a limit on how many dogs I can place on the waiting list?

Yes. To be fair to all owners of racing Greyhounds, we limit the number placed on our list by any one owner to **one or two** dogs at any time.

How long is the waiting time once my Greyhound goes onto the list?

This will vary, but is generally a number of weeks or months. We **always** have more Greyhounds available to us than (temporary) foster homes or permanent homes. As a consequence, we are only able to hold a small number of dogs at any one time and are unable to take dogs in at short notice.

As we usually have more dogs on our list than bitches, the waiting time can be longer for the males. We will do our best to take in those Greyhounds that have been on the waiting list longest, but this will depend upon our needs at the time - for example, we usually try to have a mixture of ages and sexes in foster care. We do **not** select dogs based on colour.

When is the best time to put my dog on the GAP waiting list?

Because of the unavoidable time delay, we would encourage owners / owner-trainers to put their Greyhound on the waiting list **before** the dog retires from the track.

What if my Greyhound is on the GAP waiting list and I change my mind?

No problems. If you find an alternative home for the dog before GAP can take it in, or are unable to keep it any longer, we would appreciate a call to let us know this Greyhound is no longer available. We'll take it off our list.

Will GAP take on any Greyhound?

We would like to be able to rehome every retired Greyhound in NSW and the ACT. Unfortunately this is not possible because of the sheer numbers involved, and because not all Greyhounds would make suitable pets. We will generally accept dogs over twelve months and up to five years of age. We require each dog to be physically sound and without medical problems that would lead to ongoing veterinary costs for the adoptive owner. All Greyhounds must possess an even temperament and be sociable in the presence of other dog breeds. The majority of Greyhounds rehomed by us will go to family homes in suburban or inner city areas, often with other pets (including some with cats), and must be able to walk with their owners around the local streets and parks without difficulty. If you know your Greyhound wants to chase and grab everything that moves, it is unlikely to pass our assessment – **please do not waste your time and ours by referring dogs of unsuitable temperament.**

What happens when my Greyhound is ready to be taken in by GAP?

When GAP is able to offer a place in the Program, we will contact you and arrange for you to deliver the dog to our rented kennels at Hoxton Park. All dogs must be recently bathed and free of fleas and other parasites on arrival, and MUST have a current C5 vaccination, administered at least 10 days previously.

We ask for a number of items to be posted to GAP prior to delivery of the dog: C5 vaccination certificate signed by a registered veterinary surgeon, their registration papers, weight card if applicable, "puppy papers" for unraced dogs, your email address and a monetary donation (\$50) towards our expenses.

Please let us know if your bitch has just come into season as we will delay taking her until this has been completed.

During their week or so at the kennels, new Greyhounds are introduced to small dog breeds, and in some cases, to cats as well. All dogs graduating from GAP NSW **must** be sociable with little dogs. Once we are satisfied that this is the case, the dog will undergo a general health check by a vet and will be microchipped, heartworm tested,

INFORMATION FOR OWNERS OF RACING GREYHOUNDS

wormed, desexed and teeth cleaned. When sufficiently recovered from surgery, the Greyhound is placed in one or more foster homes, where it is introduced to general household activities and where its behaviour around people, especially children, and other animals is assessed. It is then carefully matched with a family applying for a Greyhound as a pet.

If we judge your Greyhound to be unsuitable for rehoming, you will be required to collect the dog within one week or you will be charged for kennelling fees. The \$50 fee is NOT refundable, even if you take the dog back.

How does GAP “de-program” Greyhounds so they will no longer chase?

Unfortunately the perception that we can de-program these dogs from wanting to chase moving objects is **not** true - we are not magicians. We cannot overcome thousands of years of breed history and months or years of race training in a few short weeks in foster care.

However, there is a **huge range** of chasing instinct (or prey drive) within the Greyhound breed. For example, some Greyhounds are terrified of cats at first. Others want to rip them apart. It is our job, on acquiring a new dog, to assess whereabouts in this range the dog lies. We have had some quite successful racing dogs that will live harmoniously with cats and small dogs and also some supposed “non-chasers” that are very keen around small animals. Each Greyhound is assessed on its own merits. Those Greyhounds who are not safe around small dogs will be failed from the program.

What can I do to assist my Greyhound’s transition from racing dog to family pet?

There are a number of things you can do to ease your Greyhound’s transition into a pet lifestyle before it is taken in by GAP. These might include:

- Get the dog used to spending time loose in the back yard – pet homes do not generally have kennels and runs.
- Take him or her out on street walks to different places – to the park; past the local school or shopping centre; beside busy roads, etc.
- Bring him or her into the house for short periods.
- Introduce him or her to stairs and slippery floor surfaces like tiles, linoleum or polished floor boards.
- Introduce him or her to other animals under controlled circumstances (on lead and properly muzzled)– eg. other dog breeds, horses, caged birds, poultry etc.

Does GAP screen adoption applicants before placing a Greyhound with them?

Yes, very carefully. It is our primary aim to place all our adopted Greyhounds into caring, responsible, long term pet homes. Where possible, we visit each home to meet all members of the household, including children and other pets, and to assess suitability of fencing and sleeping areas. For applicants living a long distance from Sydney, we must rely on recommendations from referees and photos of the yard and fencing. GAP also has a policy that if an adopting owner can no longer keep the Greyhound, for any reason, it **must** be returned to us.

Once rehomed, can I make contact with my former racing Greyhound’s adoptive owners?

Because of privacy legislation, we can only pass on other people’s contact details if they have given permission for us to do so. Many, but not all, adoptive families are curious about their Greyhound’s former life and success (or otherwise) on the track. If you are happy to have contact with your Greyhound’s new owners, and if they wish to, we will provide your contact details to the adoptive family, so they can get in touch.
